# Open Historical Map

Freedom to add data

- **As long as it is *verifiable on the ground***
- As long as it is *somewhat permanent*
- As long as no *copyright* is infringed

Go add your specific needs!

How about historical data?

OpenStreetMap is not suited for
- Demolished buildings
- Historic borders (e.g. Roman Empire)
- Removed data

What is
OpenHistoricalMap?

OpenHistoricalMap

A copy of the OpenStreetMap software

but with historical data

OpenHistoricalMap

The world's most universal, detailed, and *out-of-date* map

Works the same!

Well, nearly...

- Additional start_date and end_data is highly recommended
- A description can be added, eventually with `description:1993`

Way less restrictive

OpenStreetMap is used every day by multiple users
- – An error in the data has real life repercussions

- – Data should be tagged correctly to be usable

> 1 million different contributors

Way less restrictive

OpenHistoricalMap is a hobby project
- Mostly intersting to historians
- Little data already there
- Feel free to import bigger datasets
- <1000 contributors

License...

- Data you add should be considered CC0 (public domain)
- Data you use should be considered OdbL

Uptime...

✳ **100%** (last 24 hours)

✳ **55.296%** (last 7 days)
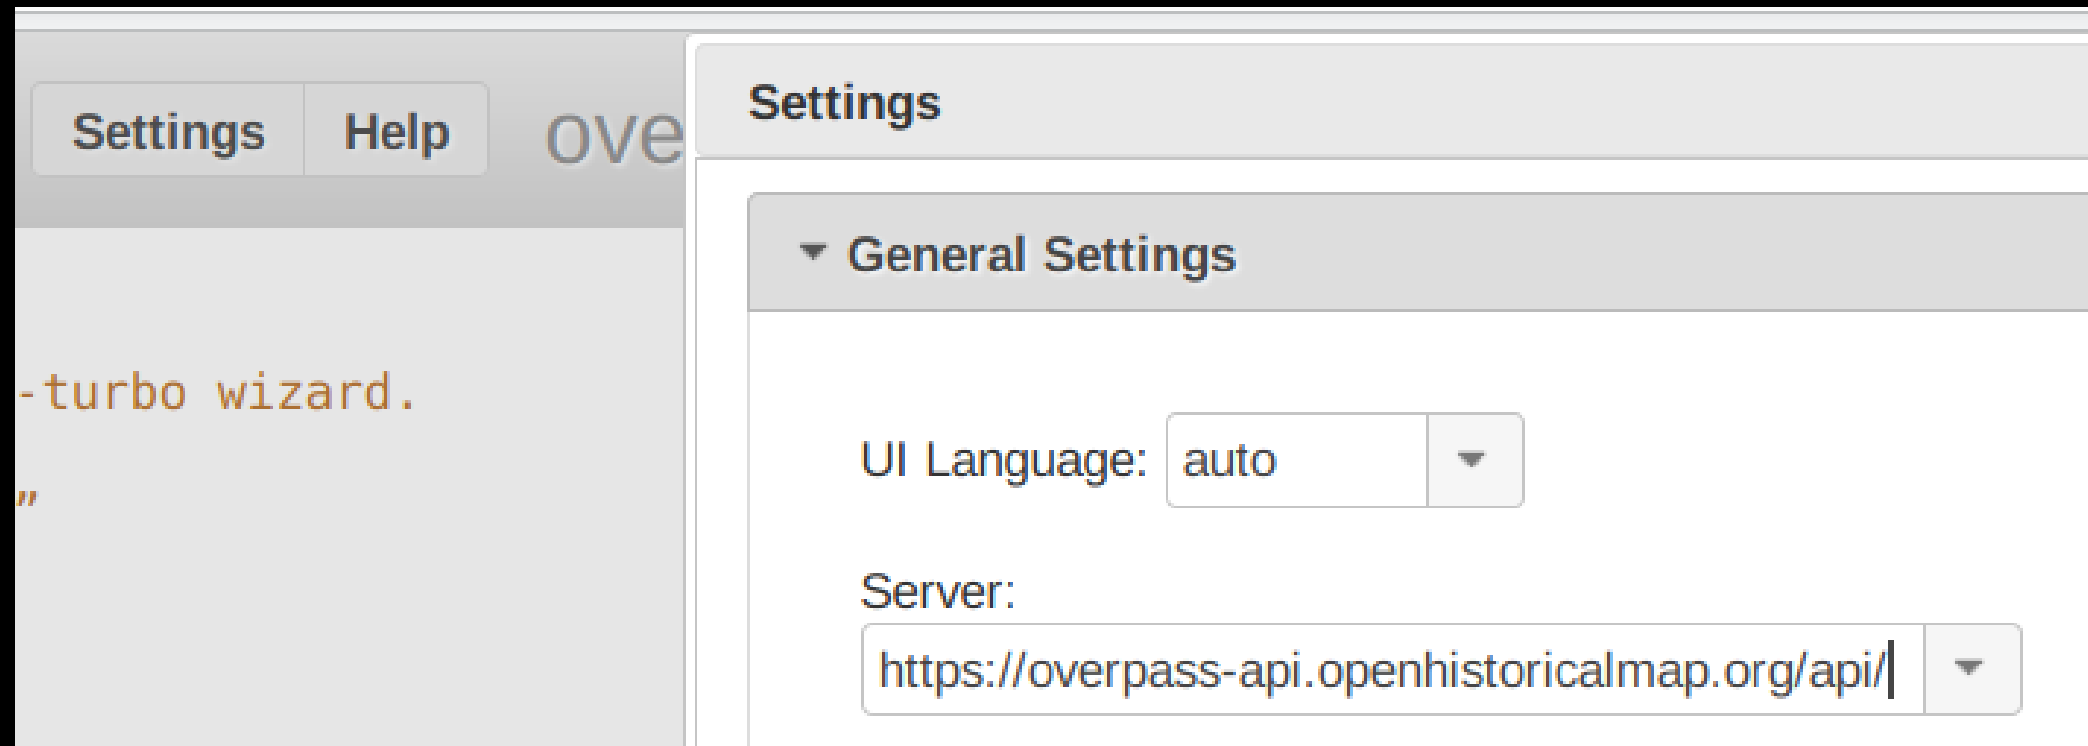

✳ **89.548%** (last 30 days)

◉ **Latest downtime**

It was recorded on 2020-02-19 12:50:11 and the downtime lasted for 75 hrs, 6 mins.
